**SEASONS
AND
YEAR
1965-66**

U.S. Department of Agriculture
Agricultural Research Service

The 1965-66 nationwide survey of household food consumption was conducted by the Consumer and Food Economics Research Division, Agricultural Research Service, U.S. Department of Agriculture. The sample was designed and the data were collected and processed by National Analysts, Inc., under contract with the Department. The data were tabulated by the General Electric Company, also under contract with the Department.

The study was carried out under the general direction of Faith Clark, formerly Director of the Consumer and Food Economics Research Division, Agricultural Research Service, and work on the survey was the concern of many individuals in the Division. Arletta M. Beloian was primarily responsible for the preparation of this report. Sadye F. Adelson, formerly chief, Food Consumption Branch, and Evelyn Grossman, chief, Survey Statistics Staff, shared the responsibility for plan-

ning and supervising the study. Elizabeth Davenport, Ennis C. Blake, and Lillian Fincher (all retired) were responsible for monitoring the technical subject matter aspects of the data processing and tabulation performed by the contractors. Corinne LeBovit supervised the development of plans for coding and tabulating the data. Supervising the publication of the survey data was the responsibility of Daniel A. Swope, chief, Food Consumption Branch.

Many potential users of data were invited during the planning of the survey to make their needs known and to contribute their ideas. To this end, special attention was given by staff members of the Economic Research Service, the Statistical Reporting Service, and the Consumer and Marketing Service of the U.S. Department of Agriculture, as well as staff members of other Federal agencies.

FOOD CONSUMPTION OF HOUSEHOLDS IN THE SOUTH, SEASONS AND YEAR 1965-66

By Consumer and Food Economics Research Division
Agricultural Research Service

INTRODUCTION

This report presents survey findings on quantity and money value of food used by households in a week in each season and the average for the year. Averages are given for 12 income groups and all households for the year 1965-66 and for all households for spring, summer, and fall of 1965 and winter of 1966. This is the first time the U.S. Department of Agriculture has obtained data on the seasonal variations in food consumption from a nationwide sample of households.¹

This survey, which began in April 1965 and continued through March 1966, is part of the Department's ongoing research program on the food and nutrition of man started around 1900. Information on the kinds and quantities of food people eat as well as the amount of money they spend for food contributes to the knowledge of food habits in the United States. The nutrient content of the food reported as consumed indicates the dietary levels of different groups within the population. Thus, nationwide food consumption surveys supply benchmarks to appraise trends, measure current variations, and identify needs for new changes in policies and new programs that will benefit the consumer. This information serves many needs.

- Congress, the Department of Agriculture, and other Federal agencies use these data to develop and administer public programs and policies that relate to the production, marketing, and distribution of food.

- Research and development laboratories, food manufacturers, and food industries use these data to bring the processing and marketing of food closer to the needs and wants of consumers. The seasonal data presented herein provide an important landmark in marketing information.

- Nutritionists, home economists, educators, and welfare workers use these data to assess the current nutritive value of diets of the population in the four seasons and to develop guidelines and programs for improving nutrition levels in the United States.

To obtain information on the Nation's dietary situation, the Department has made five nationwide surveys of food consumption over the past 30 years—in 1936, 1942, 1948 (urban only), 1955, and 1965-66. Unlike earlier surveys, data were collected for four consecutive seasons in the 1965-66 nationwide survey. Approximately 7,500 housekeeping households of one or more members were interviewed in the spring of 1965 (April-June), and 2,500 households were surveyed in each of the following three seasons: Summer 1965 (July-September), fall 1965 (October-December), and winter 1966 (January-March). Each of these seasonal samples was representative of the universe of housekeeping households but did not involve the same households. When the seasonal averages were combined for the year average, the smaller samples for summer, fall, and winter were given a weight of three.

Accordingly, the data for the year April 1965-March 1966 measure the average quantity and money value of major foods consumed by all households during a week. Annual household data for these measures are classified by region, urbanization, and income. It is not possible to derive a meaningful annual figure of the percentages of households using a food or a group of foods by combining seasonal percentages because different households were surveyed in the four seasons.

For individual seasons, this report contains information on the average quantity and money value of major foods, and the percentage of households using major foods during a week by urbanization category. No information by income categories is provided for the four seasons. Spring data by income classification were published in earlier reports. Summer, fall, and winter data by income are not being published because the smaller sample sizes used in these three seasons yielded unreliable data for some of the income subgroups. However, these data are available on request from the Consumer and Food Economics Research Division, ARS.

Households were selected to represent housekeeping households in each of the four census regions during each of the four seasons. Metropolitan areas, cities of various sizes, rural farm and nonfarm areas in the conterminous United States were surveyed. To permit adequate farm coverage, farm-operator households were oversampled. Persons living on military reservations, in institutions, and in rooming and boarding houses were excluded. A more detailed description of the sample design for the South and its analysis are presented on pages 207 to 211 of this report.

¹A 1948 survey of urban families included some seasonal data as reported in: Clark, F., Murray, J., Weiss, G. S., and Grossman, E. Food Consumption of Urban Families in the United States, With an Appraisal of Methods of Analysis. (1948 data.) U.S. Dept. Agr., Agr. Inform. Bul. 1932, 203 pp., illus. 1954.

Experienced interviewers collected the data by personal interview with a knowledgeable household member, usually the homemaker. They used a detailed food list to help the homemaker recall the kinds, quantities, and costs of foods, including alcoholic and other beverages, used at home during the 7 days preceding the interview as well as a count of meals eaten at home and away from home by each household member. Expenditures for meals and snacks away from home paid for by family members were also obtained. In addition to family income, other household data, including the age, education, and employment of the homemaker, were collected for descriptive purposes. Households in the spring sample were also asked about the kinds of food that were home produced and home preserved during 1964.

Although consumption of a food by an individual family during a week often differs from the quantity purchased, average consumption for a large number of families tends to equal average purchases. As in earlier USDA surveys, food consumption is measured at the level at which the foods come into the kitchen.

The seasonal variability of household averages for quantities of major food items and the money value of food is summarized, in terms of an index, in table 28 of this report. The largest variation in money value from season to season occurred in home-produced foods. In the Northeast, North Central Region, and South, the money value of home-produced food per household averaged almost one-third higher in the summer than the year. Value of home-produced food in the West was about one-third higher in the fall.

For each season, in the South, about one-third of the dollar value of food at home in a week (money value of purchased and nonpurchased food) was allotted to meat, poultry, fish, and eggs, about one-eighth to milk, cream, and cheese, and one-eighth to flour, cereal, and bakery products. The shares of the food dollar for nine major food categories are listed below. The averages for all urbanizations combined varied little with season.

Generally, the food dollar was divided in much the same way from season to season in the three urbanizations in the South. In rural households, fresh vegetables accounted for nearly double the proportion of the total money value of food in summer than in other seasons.

¹Weights were used to compensate for the spring sample being 3 times the size of the samples for each of the other seasons. Expanded samples of farm households also required compensatory weights: 0.20 for spring and summer, 0.18 for fall and 0.16 for winter. (See Sample Analysis, "Collection Counts"). Percents were computed from weighted counts.

Households not classified by income are included in All Households and in seasonal distribution, excluded from income distribution, and shown in parentheses as percent of All Households.

²Households not classified by income are mainly those not providing requested data, but 32 actual households are included (spring urban 10, rural nonfarm 7, rural farm 6; summer urban 4, rural nonfarm 1; fall urban 1; winter urban 2, rural nonfarm 1) in which there was no economic family in the week preceding the interview or in money income year.

YEAR AND SEASONS 1965-1966

TABLE NOTES

The following notes are designed for use with tables 2 through 27. For the most part, the notes provide the type of information usually found in footnotes at the end of individual tables. General Notes contain information and explanation applicable to all or most tables. Specific Notes refer to a particular table, group of columns, or single column of a table.

General Notes

1. "All households" includes households not classified by income.
2. Average quantity and money value per household and percent of households are based on all households in the cell. See table 1 for cell counts.
3. Component items may not cross-add to totals because of rounding.
4. The asterisk (*) indicates some but less than 0.005 pound, quart, dozen; 0.005 dollar; 0.05 percent.
5. The symbol ‡ indicates that there is a specific note.
6. See table 3 for food group totals for tables 4 through 21.
7. Homemade mixtures on hand at the beginning of the 7-day period if used during the survey week are included in prepared form rather than as ingredients. Data for all other foods are as they were brought into the kitchen. See Definitions and Explanations, "Food at home."
8. Donated food is included in tables 3 through 21. See table 22 for separate data on donated foods.
9. Commercially canned food includes baby food. See table 23 for separate data on baby food.
10. Lists of foods in the Specific Notes are not necessarily all-inclusive.
11. Mention of a trade name does not constitute an endorsement of the product by the U.S. Department of Agriculture to the exclusion of products not mentioned.

Specific Notes

TABLE 2.—MONEY VALUE OF FOOD, BY SOURCE

Col. No.	<u>Heading</u>	<u>Notes</u>
	Money value of food includes money value of alcoholic and other beverages.	
2 . . .	Household size	In equivalent persons; 21 meals at home equal one person.

Col. No.	<u>Heading</u>	<u>Notes</u>
3-5 . .	Percent of households reporting	All households reported expenditures for food used at home; therefore, the percent of households reporting food in columns 3, 4, 5 (100.0) has been omitted.
4-9 . .	At home	Including packed lunches and other food carried from home. See <u>Definitions and Explanations</u> , "Money value of food used at home."
8 . . .	Donated	Federally donated food only. See <u>Definitions and Explanations</u> .
12 . .	Snacks	Between-meal food and beverages; supplements to packed lunches.
13 . .	Meals not bought	See <u>Definitions and Explanations</u> , "Food away from home not bought."

TABLE 3.—FOOD GROUP TOTALS

See tables 4 through 21 for detailed data. **Indicates that data are not available.

2 . . .	Milk, cream, cheese (calcium equivalent) . . .	See <u>Definitions and Explanations</u> , "Milk products measures—calcium equivalent."
7 . . .	Poultry, fish	Also shellfish.
8 . . .	Eggs (fresh equivalent) . .	See <u>Definitions and Explanations</u> , "Eggs fresh equivalent."
11 . .	Fresh vegetables	Other than potatoes, sweetpotatoes. Also home-canned and home-frozen.
12 . .	Fresh fruit	Also home-canned and home-frozen.
15 . .	Juice: Vegetable, fruit . .	Single-strength equivalent of frozen concentrated juice.

Col. No.	Heading	Notes
16 ..	Dried vegetables, fruit . . .	Also home-canned and home-frozen.
17 ..	Beverages	Data for tea are for purchases rather than consumption.
18 ..	Soup, other mixtures . . .	Including baby food mixtures except formula.
19 ..	Nuts, condiments, leavenings	Data for seasonings are for purchases rather than consumption. For selected seasonings such as extracts, flavors, and meat sauce, quantity is not included.

TABLE 4.—MILK, CREAM, CHEESE

Fresh fluid milk:		
3 . . .	Whole	Also goat; concentrated.
5 . . .	Skim	Also partly skimmed, low fat, yogurt.
6 . . .	Chocolate	Also chocolate milk drink.
Processed milk:		
7 . . .	Total (calcium equivalent)	See <u>Definitions and Explanations</u> , "Milk products measures—calcium equivalent," for explanation of <u>equivalent</u> .
8 . . .	Canned, total	Cols. 9, 10, and baby formula (milk and soya); diet beverages.
9 . . .	Canned, evaporated . .	Also goat; nonfat; products such as Miluot, Topic.
11 ..	Dry, total	Cols. 12, 13, and whole milk, buttermilk.
13 ..	Dry, mixtures	Baby formula, diet beverages, soya milk products, malted milk, cocoa, and other dry mixtures containing milk.
Cream:		
16 ..	Sweet, heavy	Whipping, whipped, powdered.

Col. No.	Heading	Notes
17 ..	Sweet, half-and-half . .	Also fresh eggnog.
18 ..	Sour	Also sour half-and-half.
19 ..	Substitute	Products such as Dream Whip, Pream, Dairy Rich, Coffee Rich.
Frozen milk dessert:		
22 ..	Ice milk	Also frozen custard, milk shake.
Cheese:		
25 ..	American, natural . . .	Cheddar; also Colby, Coon, Longhorn.
26 ..	American, process . . .	Cheddar; also Brick, Pimento.
27 ..	Swiss	Emmentaler; also Gruyère.
28 ..	Cottage	Also Ricotta, Bakers, Farmer, Dutch, Pot.
29 ..	Cream	Also Neufchatel.
31 ..	Hard Italian	Parmesan, Romano, Sapsago.
32 ..	Other	Bel Paese, Blue, Brick, Brie, Caciocavallo, Camembert, Edam, Gjetost, Gorgonzola, Gouda, Liederkranz, Limburger, Mozzarella, Muenster, Mysost, Port du salut, Provolone, Roquefort, Stilton.

TABLE 5.—FATS, OILS

Shortening:		
6	Lard	Also poultry and meat fat, suet, drippings.
7 . . .	Vegetable	Hydrogenated vegetable fat; also compounds of animal and vegetable fat.
Salad dressing:		
11 ..	French	Also Italian.
13 ..	Other	Mayonnaise-type, russian, roquefort, thousand island, sandwich spread, tartar sauce.

TABLE 6.—FLOUR, CEREAL

Col. No.	Heading	Notes
	Flour:	
4 . . .	Other	Cake meal; rye, buckwheat, corn, rice, gluten, potato, whole-wheat flours; soya flour, flakes, and grits.
	Prepared flour mix:	
7 . . .	Biscuit, roll, muffin . .	Also bread, cornbread mixes.
8 . . .	Cake	Including coffee cake, cheese cake, boston cream pie mixes.
9 . . .	Pie	Piecrust mix, piecrust mix with filling. (Commercially canned fruit pie filling is included with commercially canned fruit, table 15.)
11 . .	Other	Popover, cream puff, eclair, apple crunch mixes.
	Breakfast cereal:	
16 . .	Hot, other	Rice, rye.
17-22	Cold	Plain or with added sugar, fruit, nuts, or other grain. Each cereal is classified by the grain specified first on the package.
17 . .	Cold, total	Cols. 18-22, and baby cereals.
22 . .	Cold, other	Variety pack cereals.
	Other cereal, pastes:	
29 . .	Macaroni, other pastes.	Spaghetti, noodles, pastina, dry spaghetti dinner, spaghetti with seasoning.
30 . .	Popcorn	Popped, unpopped (plain or with oil, cheese, or sugar).
31 . .	Cornstarch, other	Tapioca, barley, buckwheat groats, bulgur, millet.

TABLE 7.—BAKERY PRODUCTS

Col. No.	Heading	Notes
	All columns include products that are ready-to-eat, partly baked, and doughs and batters, but exclude prepared flour mixes (table 6).	
	Bread:	
3 . . .	White	Including egg, cheese, potato, soya, high-protein breads.
5 . . .	Other	Rye, other grains, mixed grains; bread with added fruit or nuts; bread crumbs, tortilla, melba toast, zwieback.
	Other bakery products:	
6 . . .	Total	Cols. 7-14, and ice cream cones, blintzes, toaster-tarts.
7 . . .	Crackers	Unsweetened crackers, any grain; also corn chips, pretzels, chow mein noodles, cracker meal.
10 . .	Cake	Including cheese cake, ice cream cake, ice cream cake roll, boston cream pie, gingerbread.
11 . .	Pie	Also tarts, strudel, turnovers, piecrust, cream puffs, eclairs, french pastry.
12 . .	Cookies	Also sweet crackers.
13 . .	Coffee cake	Also sweet buns, sweet rolls, waffles, pancakes, danish pastry.

TABLE 8.—MEAT

Fresh meat includes home-frozen and commercially frozen meat. All canned, cooked meats include both home-canned and commercially canned.

Beef:

4 . . .	Steak, round	Including minute, cube, swiss.
6 . . .	Steak, porterhouse . . .	Also club, T-bone.

Col. No.	Heading	Notes
7 . . .	Steak, other	Chuck, flank, rib, delmonico, tenderloin.
9 . . .	Roast, chuck	Also brisket, california, cross-cut, pot roast, shoulder.
12 . .	Roast, rump	Also top sirloin, sirloin tip.
13 . .	Stewing	Also boiling beef for soup.
14 . .	Corned, chipped, dried.	Also pastrami.
15 . .	Ground	Including beef with pork, veal, or other meat.
16 . .	Other, raw	Plate beef, shank, short ribs, oxtails; stewing, boiling, and soup beef with bone.
Pork:		
24 . .	Fresh, other	Boston butt, picnics, shoulder, steak, neckbones, pigs' feet, spareribs.
26 . .	Cured, smoked ham . .	Including sliced boiled ham.
28 . .	Cured, smoked salt pork	Including fat back, side pork, streak of lean; also cracklings, fresh jowls, pork skins.
29 . .	Cured, smoked other .	Boston butt, canadian bacon, chops, ham hocks, loin roasts, picnics, pickled pork products, sausage.
30 . .	Canned, cooked	Including ham, bacon, sausage.
Veal:		
31 . .	Total	Cols. 32-34, and canned, cooked veal.
34 . .	Stewing, ground	Also breast, plate, patties, mock "chicken" legs, veal for soup.
Lamb:		
35 . .	Total	Cols. 36-38, and canned, cooked lamb.
38 . .	Stewing, ground	Also breast, shank, patties, lamb for soup.

Col. No.	Heading	Notes
Variety meat:		
39 . .	Total	Including canned, frozen, cooked.
41 . .	Other	Brains, chitterlings, kidneys, lungs, tongue, tripe, poultry giblets.

TABLE 9.—POULTRY, FISH

Poultry:		
2-5	Including canned, frozen, cooked.
5 . . .	Other	Cornish game hen, duck, goose, guinea, pheasant, quail, squab, other game birds.
Fish, shellfish:		
7 . . .	Fish, total	Cols. 8-10, and smoked, pickled, dried.
8 . . .	Fish, fresh	Also home-canned and home-frozen, cooked; roe, frog legs, turtle.
10 . .	Fish, commercially canned, total	Cols. 11, 12, and anchovies, caviar, gefilte fish, kippered herring, sardines.
13 . .	Shellfish	Including canned, frozen, cooked.

TABLE 10.—EGGS

2 . . .	Total (fresh equivalent).	Cols. 3-7, and in-shell equivalent of liquid eggs (yolks, whites, mixed yolks and whites) and processed eggs not shown separately.
Fresh, in shell:		
3 . . .	Small	Also peewee, pullet.
6 . . .	Extra large	Also jumbo.

TABLE 11.—SUGAR, SWEETS

Sugar:		
2 . . .	Total	Cols. 3, 6, and maple and baby formula sugars.

Col. No.	Heading	Notes
5 . . .	White, powdered	Including confectioner's.
9 . . .	Sirup, molasses, honey: Sirup, corn, cane	Also blends of corn and cane.
10 . .	Sirup, other	Maple, sorghum, fruit sirups, blends other than corn and cane.
13-15	Jelly, jam:	Including home-preserved and commercially preserved.
15 . .	Jam, fruit butter	Also preserves, marmalade, fruit topping.

TABLE 12.—POTATOES, SWEETPOTATOES

Fresh:		
3 . . .	White	Also home-canned and home-frozen.
4 . . .	Sweetpotatoes	Also home-canned and home-frozen.
Commercially frozen:		
8-12	Including cooked, raw.
11 . .	White, other	Cottage fries, patties, hash brown, mashed, puffs, scalloped, au gratin, baked, potato pancakes.
Dried:		
13	Also potato pancake mix.

TABLE 13.—FRESH VEGETABLES

All columns include home-canned, home-frozen, and cooked vegetables.		
Dark green:		
8 . . .	Leafy, other	Chard, cress, escarole, parsley; beet, turnip, wild greens.
Deep yellow:		
12 . .	Carrots	Also carrots and peas.

Col. No.	Heading	Notes
Other green:		
22 . .	Peas	English or green, black-eyed, field, cow, snowpeas.
23 . .	Other	French or globe artichokes, brussels sprouts, green soybeans.
Other vegetables:		
27-28	Onions	Also garlic, chives, scallions.
33 . .	Other	Eggplant, horseradish, kohlrabi, mixed vegetables for salad or soup, mushrooms, parsnips, radishes, rutabagas, sauerkraut, succotash, summer squash.

TABLE 14.—FRESH FRUIT

All columns include home-canned, home-frozen, and cooked fruit.		
Citrus:		
6 . . .	Other	Kumquats, tangerines, tangelos, temple oranges, any fresh citrus segments.
Other vitamin C rich:		
7 . . .	Total	Cols. 8, 9, and currants, guava, mango, persimmons.
8 . . .	Cantaloup	Also muskmelon, persian melon, papaya.
Other:		
10 . .	Total	Cols. 11-23, and figs, mixed fruit, pomegranates.
12 . .	Bananas	Including plantains.
15 . .	Melons except cantaloup	Watermelon, casaba, honeydew, mixed melon balls; also other melons except melons in col. 8.
18 . .	Apricots	Also nectarines.

TABLE 15.—COMMERCIALY CANNED VEGETABLES, FRUIT

Col. No.	Heading	Notes
All columns include dietary pack vegetables and fruit; fruit columns include fruit for pie filling.		
Vegetables:		
3 . . .	Dark green	Collards, kale, mustard greens, turnip greens, spinach, pimientos, red and green peppers.
4 . . .	Deep yellow	Carrots, carrots and peas, pumpkin, winter squash.
5 . . .	Tomatoes	Also aspic, paste, puree; tomatoes with other vegetables.
8 . . .	Baked beans	Also mature beans and peas, lentils—with or without pork.
10 . .	Snap beans	Green, wax, or yellow; shellie beans.
11 . .	Beets	Also beets and greens.
13 . .	Green peas	Also immature field and black-eyed peas, snowpeas.
15 . .	Other	Chinese vegetables, horseradish, mixed vegetables, mushrooms, onions, okra, succotash.
Fruit:		
17 . .	Citrus	Citrus segments, tangerine, kumquat.
27 . .	Other	Figs, grapes, mincemeat, plums, prunes, raisins.

TABLE 16.—COMMERCIALY FROZEN VEGETABLES, FRUIT

All vegetable columns include vegetables with butter, cream, cheese sauce, nuts, mushrooms, or other additions.

Vegetables:

3 . . .	Dark green, total	Cols. 4, 5, and peppers.
---------	---------------------------	--------------------------

Col. No.	Heading	Notes
4 . . .	Dark green, leafy	Chard, collards, kale, mustard greens, parsley.
6 . . .	Deep yellow	Carrots, carrots and peas, pumpkin, winter squash.
10 . .	Snap beans	Green, wax, or yellow; also Italian, broad.
11 . .	Green peas	Also black-eyed peas, snowpeas.
13 . .	Other	Artichokes, beets, brussels sprouts, cauliflower, dry beans, eggplant, mixed vegetables, mushrooms, okra, onions, summer squash.
Fruit:		
14 . .	Total	Col. 15, and apples, apricots, blackberries, blueberries, cherries, citrus segments, melon balls, mixed fruit, peaches, pineapple, raspberries, rhubarb.
TABLE 17.—JUICE: VEGETABLE, FRUIT		
Vegetable:		
2 . . .	Canned, total	Col. 3, and carrot, mixed vegetable, sauerkraut.
Fruit:		
9 . . .	Canned, other citrus . .	Lemon, lime, tangerine, blends of citrus with or without noncitrus.
10 . .	Canned, total noncitrus	Cols. 11-13, and blackberry, fig, prune.
11 . .	Canned, apple, cider . .	Also blends containing any apple.
Frozen:		
14-18	Concentrated commercially frozen; single-strength home-frozen.
17 . .	Frozen, other citrus . .	Grapefruit, lemon, lime, tangerine, blends of citrus with or without noncitrus.
18 . .	Frozen noncitrus	Apple, cider, grape, pineapple.
19 . .	Fresh	Mainly citrus.

TABLE 18.—DRIED VEGETABLES, FRUIT

Col. No.	Heading	Notes
	All columns include home-dried and commercially dried vegetables and fruit. Canned, frozen, and cooked dried items are also included except for commercially canned dry beans (table 15).	
	Vegetables:	
5 . . .	Other	Dehydrated carrots, garlic, onions, parsley, mixed vegetables.
	Fruit:	
8 . . .	Raisins	Also currants.
9 . . .	Other	Apples, apricots, dates, figs, mixed fruit, peaches, pears.

TABLE 19.—BEVERAGES

	Coffee:	
2 . . .	Total	Cols. 3-5, and liquid concentrate.
5 . . .	Substitute	Products such as postum, chicory.
	Tea (purchases):	
6-8		Data are for purchases during 7-day period rather than for consumption.
	Cocoa, chocolate:	
9 . . .		Including cocoa without dry milk; baking chocolate; chocolate sirup or topping.
10, 14, 19 . . .		Including home-prepared.
	Soft drink:	
10 . .	Total	Cols. 11, 12, and club soda, ginger ale, quinine water, root beer, seltzer, all <u>diet</u> soft drinks.
11 . .	Cola	Excluding diet type.
12 . .	Fruit	Excluding diet type.

Col.
No.

Heading

Notes

	Fruit ade, drink, punch, nectar:	
14 . .	Ready-to-drink	Including cranberry juice cocktail, nectar; canned, bottled, fresh.
16 . .	Concentrated, frozen . .	Also daiquiri, other beverage mix.
17 . .	Powdered, with sugar . .	Also iced tea mix with sugar.
18 . .	Powdered, without sugar	Including artificially sweetened.
	Alcoholic beverage:	
21 . .	Whisky, gin, rum	Also vodka.
22 . .	Wine	Including champagne, vermouth; also ready-mixed cocktails.
23 . .	Brandy, liqueur	Including cordials, fruit brandy; also tequila.

TABLE 20.—SOUP, OTHER MIXTURES

	Soup, sauce, gravy:	
3 . . .	Ready-to-serve	Including commercially canned, home-canned and home-frozen, cooked.
6 . . .	Frozen	Commercial only.
7 . . .	Dry	Also bouillon cubes, granules, paste, powder.
	Baby food mixtures:	
8 . . .		Products such as milk and fruit pudding; vegetables with meat, cereal, egg.
	Other mixtures:	
9 . . .	Not sweet, total	Cols. 10, 11, and mixtures mostly milk products, vegetable, or grain.
12 . .	Sweet, total	Cols. 13-15, and meringue shells, junket tablets.
13 . .	Gelatin, pudding	Dry—plain, mix; ready-to-eat.

Col. No.	Heading	Notes
14 ..	Ices, popsicles	Also snowballs.
15 ..	Icing	Dry, ready-to-use.
TABLE 21.—NUTS, CONDIMENTS, LEAVENINGS		
**Indicates that data are not available.		
Nuts, peanut butter:		
6-8 ..	Other nuts	Also pumpkin, squash, and sunflower seeds.
9 ...	Peanut butter	Also other nut butter.
Condiments:		
10-17	Including home-prepared and commercially prepared.
11 ..	Catsup, chili sauce ...	Also cocktail sauce.
12 ..	Barbecue sauce	Also spaghetti, pizza sauce.
13 ..	Tomato relish	Also tomato pickles.
Leavenings:		
19 ..	Yeast	Also brewer's powdered.
Seasonings (purchases):		
21-24	Data are for purchases during 7-day period rather than for consumption.
21 ..	Total	Cols. 22-24, and cream of tartar, soda, pepper, other spices, herbs, dry salad dressing mix, dip mix, extracts, flavors, meat sauce. Quantity omitted for extracts, flavors, meat sauce.

TABLE 22.—FEDERALLY DONATED FOOD

Data for these foods are included as a part of related items or groups of food in table 3 through 21. See table 2 for total money value of all donated foods and percent of households using any donated food.

Col. No.	Heading	Notes
"All households" includes a few households with income \$5,000 and above. Eligibility requirements for federally donated food are usually based on income for household size. Therefore very large households could have incomes above \$5,000 and be eligible.		
6 ...	Flour	White enriched, whole-wheat.
8 ...	Other cereal, total ...	Cols. 9, 10, and bulgur.
11 ..	Canned meat	Beef, pork and gravy, chopped meat.
13 ..	Dry beans, peas	Pea beans, pinto beans; green-split peas.

TABLE 23.—BABY FOOD

Data for baby foods are also included under the proper item in tables 3 through 21.

Commercially canned:		
3 ...	Total	Cols. 4-9, and cottage cheese.
6 ...	Vegetables	Including vegetable soup, sweetpotatoes.
7 ...	Fruit	Including fruit with cereal or tapioca.
9 ...	Mixtures, total	Cols. 10-12, and mixtures mostly milk, fruit, poultry, fish, egg, or legume.
13 ..	Cereal	Dry, canned.
14 ..	Teething biscuit	Also baby cookies, pretzels.
15 ..	Formula sugar	Dyna-dextrose, dextri-maltose.

TABLE 24.—MILK PRODUCTS EXCEPT BUTTER—THREE MEASURES

See Definitions and Explanations, "Milk products measures," for explanation of terms.

2-4	Fluid milk equivalent, calcium basis	See table 3, col. 2 for quarts.
-----	--	---------------------------------

<u>Col. No.</u>	<u>Heading</u>	<u>Notes</u>
TABLE 25 through 27.—Money value and expense for food includes that for alcoholic beverages. See <u>Definitions and Explanations</u> , “Money value of food used at home” and “Source of food” for explanation of terms.		
TABLE 25.—MONEY VALUE OF ALL FOOD AT HOME PER PERSON PER WEEK		
2 . . .	Average (dollars)	Money value per person—household averages, table 2, col 4, divided by household size, table 2, col. 2.
TABLE 26.—EXPENSE FOR BOUGHT FOOD AT HOME PER PERSON PER WEEK		
2 . . .	Average (dollars)	Expense per person—household averages, table 2, col. 5, divided by household size, table 2, col. 2.

<u>Col. No.</u>	<u>Heading</u>	<u>Notes</u>
TABLE 27.—MONEY VALUE OF HOME-PRODUCED FOOD AT HOME PER PERSON PER WEEK		
2 . .	Average (dollars)	Money value per person—household averages, table 2, col. 6, divided by household size, table 2, col. 2.
TABLE 28.—SEASONAL INDEXES FOR SELECTED FOOD GROUPS BASED ON YEAR AND SPRING AVERAGES		
5-8. .	Year average = 100	Household average for each season divided by average for year.
9-12.	Spring average = 100	Household average for each season divided by average for spring.

SAMPLE ANALYSIS

Description of Universe

Information for the 1965-66 study of consumption of food from household food supplies was collected by interviewing 15,112 households of one or more members. The households were scientifically selected to represent those in metropolitan areas, cities of various sizes, and rural farm and nonfarm areas in all parts of the United States except Alaska and Hawaii. Excluded were the approximately 5 percent of the population who were not housekeeping: 1.5 percent had not been visited because they were living in group quarters such as rooming houses, hospitals, and prisons; the other 3 to 4 percent were excluded when an initial screening indicated that they were in households in which no member ate as many as 10 meals from the home-food supplies. Interviewing began in all regions on April 3, 1965, and continued until April 2, 1966. Each family was asked to report on its food consumption for the 7 days preceding the interview.

Design

The 15,112 interviews were allocated by time and place so that optimum use could be made of the schedules for the various kinds of analysis units. Thus, half the schedules (7,532) were collected in spring 1965 and the other half distributed equally among the three other seasons (summer and fall 1965 and winter 1966).

The sample design provided, in each season, for a national self-weighting basic sample plus a supplementary farm sample which overweights the number of farm households in the proportion of 5:1. The weights used for unifying the schedules in proportions appropriate to the season and urbanization distributions are shown in the section "Collection Counts."

The households to be interviewed were selected in accordance with a multistage area sample design with added control by season.

Delineation of 106 strata with equal number of households was accomplished by dividing conterminous United States into 27 classes—nine geographic divisions by three population density classes.² These classes were created by a primary break between Standard Metropolitan Statistical Areas (SMSA) and nonmetropolitan areas with a further breakdown in the SMSA's between the central city (50,000 or more) and the areas not in the central city. Within each of the 27 classes, State Economic Areas³ were identified and combined into strata containing approximately a half million households. The strata allocation is as follows:

²Divisions, Standard Metropolitan Statistical Areas and cities as defined by U.S. Bureau of the Census in U.S. Census of Population: 1960.

³U.S. Bureau of the Census, State Economic Areas: 1951.

Region and division	Total	Standard Metropolitan Statistical Area		Nonmetropolitan area
		Central city	Outside central city	
Total	106	40	28	38
Northeast:				
New England	6	2	2	2
Middle Atlantic	20	10	6	4
North Central:				
East North Central	20	8	6	6
West North Central	10	2	2	6
South:				
South Atlantic	16	4	4	8
East South Central	7	2	1	4
West South Central	9	4	1	4
West:				
Mountain	5	2	1	2
Pacific	13	6	5	2

Central cities are entirely urban. Other parts of the SMSA's and the nonmetropolitan areas are both urban and rural.

For the basic sample, 144 first-stage units of expected size of 10,000 households were selected at random—one from each of the 68 SMSA strata (40 in the central city and 28 outside) and two from each of the 38 nonmetropolitan strata as shown by region in the following table:

Region	Total	Standard Metropolitan Statistical Area		Nonmetropolitan area
		Central city	Outside central city	
Total	144	40	28	76
Northeast	32	12	8	12
North Central	42	10	8	24
South	48	10	6	32
West	22	8	6	8

Within each first-stage unit, second-stage units of 30 expected housing units were selected, also at random—approximately 19 from each SMSA stratum and 9 or 10 from each nonmetropolitan stratum. There were approximately 2,000 second-stage units in the basic sample.

Each of the second-stage units was visited and a list of housing units prepared. By systematic selection, housing units were chosen for interview in the spring in

sufficient number to yield an average of three schedules per second-stage unit after allowing for vacancies and ineligible or otherwise nonparticipating households. The lists were updated in the summer, in the fall, and in the winter, and a sufficient number of households were chosen to yield an average of one schedule per second-stage unit in each of these seasons. The four seasonal samples were selected independently by using different random starts in the second-stage units.

The farm household universe is relatively small. If it had been represented in its true proportion, there would have been too few schedules to support analysis. Therefore a supplementary farm household sample was added to the basic sample. This supplement of about 500 second-stage units was drawn from the 104 previously selected first-stage units in the nonmetropolitan areas and the parts of the SMSA's outside the central cities. These second-stage units were allocated between the metropolitan and nonmetropolitan sectors in proportion to the estimated number of farm households, but inadvertently, selection was made with probability proportionate to the total number of households. Field collection showed that "total households" was not a good indicator of farm household distribution within the metropolitan sector. To prevent underrepresentation in this sector, 40 of the second-stage units were withdrawn and 35 others were doubled in size.

No substitutes were provided for households unable or unwilling to participate in the survey. Interviewers were instructed to call as many as three times if necessary to make the original contact in rural places, four times in urban places, and six times in 281 second-stage sample units in 15 large cities where collection difficulties were anticipated.

Collection Counts, Seasons and Year 1965-66

In the South 5,349 households provided schedules. These are equivalent to a self-weighting sample of 2,620. The distribution by season and urbanization is as follows:

Season and urbanization	Schedule counts	Weighted counts
Year—all urbanizations	5,349	2,620
Urban	2,359	1,560
Rural nonfarm	1,254	841
Rural farm	1,736	219
Spring—all urbanizations	2,651	662
Urban	1,199	400
Rural nonfarm	619	206
Rural farm	833	56

Season and urbanization	Schedule counts	Weighted counts
Summer—all urbanizations	921	673
Urban	394	394
Rural nonfarm	217	217
Rural farm	310	62
Fall—all urbanizations	882	629
Urban	362	362
Rural nonfarm	211	211
Rural farm	309	56
Winter—all urbanizations	895	656
Urban	404	404
Rural nonfarm	207	207
Rural farm	284	45

The weighted counts differ from the number of households scheduled for three reasons. First, in each season, collection of farm schedules was designed to be five times as great as required by relative number in the population. Second, there was overcollection of farm schedules in the fall and winter. To compensate for both of these imbalances, farm schedules were assigned weights of 0.20 for spring and summer, 0.18 for fall, and 0.16 for winter. The third weight was to equalize the importance of schedules collected in each season; each spring schedule was assigned a weight of one-third to compensate for collection at three times the rate of that in the other seasons. Farm schedules collected in the spring were assigned weights for all the imbalances. The tabulation of spring data alone did not require the third weight (seasonal), and the spring publications show weighted counts three times the size of these.

The data shown in this report were computed from all schedules with weights as follows: Urban and rural nonfarm—spring 0.3333, other seasons 1.0000; rural farm—spring 0.0667, summer—0.2000, fall—0.1800, and winter—0.1600.

In the collection process, not all housing units yielded schedules. Sometimes one was contacted even after repeated visits. In some households no member ate at least 10 meals from the home-food supply during the 7 days preceding the interview; therefore, they were ineligible for the survey. Some eligible families were unwilling or unable to participate. The eligible nonparticipants constituted about 20 percent of the eligible households in this survey for all regions combined. Many past studies have shown that nonparticipation rates are higher in urban than rural communities. Information on participation rates and on the count of households never reached are not available for this report.

Appraisal

When collection counts of supplementary farm schedules revealed that distribution to "total households" was not a good indicator of farm household distribution, adjustment was made by withdrawing a few segments and enlarging a few others. This affected only 7 percent of the supplementary farm sample segments in the South and was intended to avoid underrepresentation of the farms in SMSA's. No information on this problem is available for the nonmetropolitan sector. The net result could be slight overrepresentation of farms in the more densely populated areas of both sectors. Some urban households (about 6 percent of the 1965 total) are included with rural nonfarm because recently developed areas reclassified from rural to urban by the census had not been updated. The effect of the omission from the urban data is probably not great but the rural nonfarm consumption data may be somewhat biased toward urban patterns.

Census data were used to evaluate the representativeness of the sample of households scheduled in the spring. Definitions are not strictly comparable. A census household consists of occupants of a housing unit, whereas in this survey, a household was not scheduled unless some member ate at least 10 meals from the household-food supply during the 7 days preceding the interview. Most of the census data refer to 1960 and changes during the subsequent 5 years are to be expected. The spring sample showed more homeowners and nonwhite urban households than did the Census reports.

The summer, fall, and winter samples are small, particularly in the rural sectors. It is important, therefore, to examine the characteristics of households in each sample so that possible differences in "mix" would not be attributed to seasonal consumption differences.

The differences among the samples in the four seasons, with regard to the characteristics examined (table 29), are few and without particular pattern. There is some maldistribution by household size but the only meaningful discrepancy in average size is between fall and winter farm households (4.2 vs. 3.7). There were more nonwhite households in the summer and fall farm samples (23 and 24 percent) than in the spring and winter (19 percent). Somewhat less off farmwork in 1964 was reported by the winter respondents than those in the other seasons, particularly the fall (40 percent vs. 51 percent).

Between 4 and 5 percent of the households reported food consumption but not income (table 1) in each season. They constituted about 5 percent of the urban, 3 percent of the rural nonfarm, and 2 percent of the farm participants in each of the seasons. The households not reporting income were, on the average, smaller than all households reporting food consumption. For the year as a whole, the difference was 0.6 meal-equivalent persons; for the urban, rural nonfarm, and farm sectors, respectively, the differences were 0.6, 0.1, 0.5 meal-equivalent persons. For the first three seasons, the difference was 0.7, but for winter, 0.3. By urbanization within season, the differences were without pattern; those not classified by income were as much as 1.0 meal-equivalent person larger (spring rural nonfarm and fall farm) and as much as 0.7 meal-equivalent person smaller (winter rural nonfarm) than the participants.

The differences in characteristics by season are not statistically significant for these size samples. Nor do they indicate that there is any substantial bias in the food consumption data. However, the differences exist; averages based on the small samples unmitigated, reflect any unusual consumption reports and should be used with caution. Some household average consumption figures based on few reports are shown so that their contribution to the larger annual, regional, and urbanization samples can be noted.

YEAR AND SEASONS 1965-1966

DEFINITIONS AND EXPLANATIONS

All Urbanizations.—Includes all households in the urban, rural nonfarm, and rural farm urbanization categories. See "Urbanization."

Bought Food.—See "Source of Food."

Donated Food.—Federally donated food only. See "Source of Food."

Eggs Fresh Equivalent.—Quantity of frozen, dried, or liquid eggs without shell, whether the whole egg, whites, or yolks only, converted to the weight of equivalent amounts of eggs in shell.

Eligible Households.—Those with at least one person having 10 or more meals from the household food supply during the 7 days preceding the interview.

Family.—Persons living alone or a group of persons living together and drawing from a common fund for the major items of expense, such as food, housing, and automobile. Unmarried sons and daughters of any age if living at home were considered part of the family. Other persons, related or unrelated, living with the family were included only if they drew from a common family fund for the major items of expense.

Any persons who were usually part of the family but who were temporarily away from home—at school, at work, in the hospital, or on vacation—were included with the family. However, sons or daughters in the Armed Forces who were quartered away from home on military installations were not considered part of the family.

Farm Household.—A household that included a farm operator at the time of interview.

Farm Operator.—A person who at the time of the interview made the decisions and controlled the operation of property consisting of (1) 10 or more acres yielding sales of at least \$50 in 1964 or (2) fewer than 10 acres yielding sales of at least \$250 in 1964 or (3) land expected to yield sales in 1965 meeting either of the above specifications.

The farm operator performed the labor himself or directly supervised it. He was an individual operator or had one or more partners and either owned or rented the property by cash or cropping arrangement. The operator's dwelling unit did not have to be located on the farm property.

Food at Home.—Food and beverages (alcoholic and nonalcoholic) from the household food supplies "used" during the 7 days before the date of the survey interview. This included food and beverages eaten at home, carried from the home

in packed meals, thrown away, and food fed to pets. Food fed to animals raised for commercial purposes and commercial "pet" food were omitted. Food that was obtained with cash, credit, food stamps, coupons, or food vouchers, and food that was home produced, federally donated, received as a gift or payment for goods and services, or received from welfare agencies was included.

Any food from the respondent's household that was given away for use outside the home, such as food sent to sons in the military service, gifts of food donated to a church supper, or food given to household help to take home, was also excluded from food at home.

Food used at home was classified by form—fresh, commercially canned or frozen, home-canned or frozen, and dried or dehydrated. Generally, the food used at home was reported in the form in which it was brought into the kitchen.

Concerning homemade mixtures, the period of preparation relative to the interview date determined the procedure for recording them on the schedule. If the mixture used was prepared from home food supplies during the 7 days of the survey week, the kind and amount of each ingredient were recorded. For example, a homemade cake prepared anytime within the survey week was included with quantities of flour, eggs, sugar, fat, and milk. But a homemade mixture used during, but prepared before, the survey week was recorded in the name of the product in the same way as a commercially prepared mixture was recorded. To illustrate, a cake that was prepared at home on any day before the survey week, or a bakery cake that was brought from the store into the kitchen, was entered on the schedule as a ready-to-eat cake.

If home-canned or home-frozen vegetables and fruit and home-preserved jelly, jam, pickles, or relish were processed before the survey week they were also recorded in the same way as commercially prepared mixtures. However, when the canned, frozen, or preserved food was made at home during the 7-day period, only the ingredients of the portion used during that period were recorded.

Food at Home Not Bought.—Food used at home that was home produced, donated, and received as a gift or instead of pay. See "Source of Food."

Food Away From Home.—Any food and beverage (alcoholic and nonalcoholic) in meals and snacks purchased by the family for themselves and their guests away from home during the week. The expense for such food and beverages included sales tax and tips. Food eaten by the family in other homes or elsewhere as guests or employees for which no family expense was involved was not included in expense for food away from home. See "Food Away From Home Not Bought."

Food Away From Home Not Bought.—The number of meals with no family expense, that is, meals eaten by the family in other homes or elsewhere as guests or employees.

Home-Produced Food.—See “Source of Food.”

Household.—A family or a group of unrelated persons who lived together and their guests, boarders, and hired help.

Household Size.—The total number of meals served to all persons in the household from family food supplies divided by 21 (based on three meals a day for 7 days for one person) to obtain the household size in equivalent persons. When meals reported eaten at home and away from home did not add to 21 meals for each person, the skipped meals were distributed as bought, free, and from household food supplies in the same proportion as the reported meals. The count of equivalent persons was not adjusted for between-meal snacks or additional meals, such as those served to invalids or young children. However, the meals served to guests, boarders, and hired help were included.

Lunches carried from home, but supplemented by other food purchased, received as a gift, or received instead of pay, were counted as one-half meal at home and one-half meal from one of the other sources; lunches supplemented only by beverages were counted as full meals at home.

Refreshments served to guests were also counted in the total meals from household food supplies, but were not given the same value as a full meal. Servings of a single food or two, for example, a glass of milk or a cup of coffee and a doughnut, were considered light refreshments and counted as one-fourth meal for each guest. More than two refreshment items served at one time, such as ice cream, cake, and coffee, were counted as one-half meal for each guest served. Any refreshments served to persons who were part of the family were not counted unless they substituted for a regular meal.

Milk Products Measures:

Calcium equivalent: Quantity of whole fluid milk to which dairy products (except butter) are equivalent in calcium content. The chief source of data on the calcium content of the various dairy products was “Composition of Foods—Raw, Processed, Prepared,” U.S. Department of Agriculture, Agriculture Handbook No. 8, December 1963.

Fat content and nonfat solids content: Quantity of milk fat (in pounds) and of milk nonfat solids (in pounds) contained in milk, cream, ice cream, and cheese used by households in a week. The source of most of the factors was “Conversion Factors and Weights and Measures for Agricultural Commodities and Their Products,” U.S. Department of Agriculture Statistical Bulletin No. 362, June 1965.

Money Income.—Respondent’s estimate of the family’s 1964 money income (after deduction of State and Federal income taxes) for spring and summer and 1965 money income for fall and winter within one of the income classes grouped by \$1,000 increments up to \$12,000 and by broader income ranges above \$12,000 up to \$25,000 or more.

Money Value of Food Used at Home.—Price paid for bought food “used” in the survey week regardless of the time of purchase. Sales tax was excluded. Bought food with unreported prices, food produced at home, and food received as a gift or instead of pay were valued at prices paid for similar items by other families in the same region and urbanization. Federally donated foods were valued at average retail prices from the Bureau of Labor Statistics commodity index for the United States.

Not Classified by Income.—Households that were not families at the time of the survey or for the year 1964 and households in which respondents were either unable or unwilling to give information about income. See “Family.”

Rural Farm.—See “Urbanization.”

Rural Nonfarm.—See “Urbanization.”

Seasons:

Spring: April, May, and June 1965.

Summer: July, August, and September 1965.

Fall: October, November, and December 1965.

Winter: January, February, and March 1966.

Source of Food.—Classification of food as bought, home produced, federally donated, or received as a gift or instead of pay.

Bought: Food received for cash, on credit, with Federal food stamps (coupons), or with vouchers. Also includes home-canned, home-frozen, and home-baked goods if the major ingredient was purchased.

Home-produced: Food raised for home use and food obtained by hunting, fishing, and gathering from the wild.

Donated: Food from USDA’s Direct Distribution Program issued to low-income families by State and local welfare agencies.

Gift or pay: Food received as a gift or from an employer.

Urban.—See “Urbanization.”

Urbanization.—Distinction between urban and rural households was based on the size of place in which the dwelling was located. Within the rural category, distinction between farm and nonfarm households was based on the presence of a farm operator. Definitions are those used by the Department of Commerce for the Population Census (1960) and the Agriculture Census (1964).

All households: Composite of urban, rural nonfarm, and rural farm households appropriately weighted.

Urban: Households in places with at least 2,500 inhabitants and in closely settled fringe areas surrounding cities of 50,000 or more inhabitants.

Rural nonfarm: Households outside of urban places without a farm operator.

Rural farm: Households outside of urban places with a farm operator.

Weights.—See “Sample Analysis.”

Year.—See “Seasons.”

14. Food Consumption of Households in the North Central Region, Seasons and Year 1965-66
15. Food Consumption of Households in the South, Seasons and Year 1965-66

SURVEY REGIONS

Classification of conterminous States as defined by the 1960 Census follows:

Northeast

Connecticut
Maine
Massachusetts

New Hampshire
New Jersey
New York

Pennsylvania
Rhode Island
Vermont

North Central

Illinois
Indiana
Iowa
Kansas

Michigan
Minnesota
Missouri
Nebraska

North Dakota
Ohio
South Dakota
Wisconsin

South

Georgia
Kentucky
Louisiana
Maryland
Mississippi
North Carolina

Oklahoma
South Carolina
Tennessee
Texas
Virginia
West Virginia

West

Alabama
Arkansas
Delaware
District of
Columbia
Florida

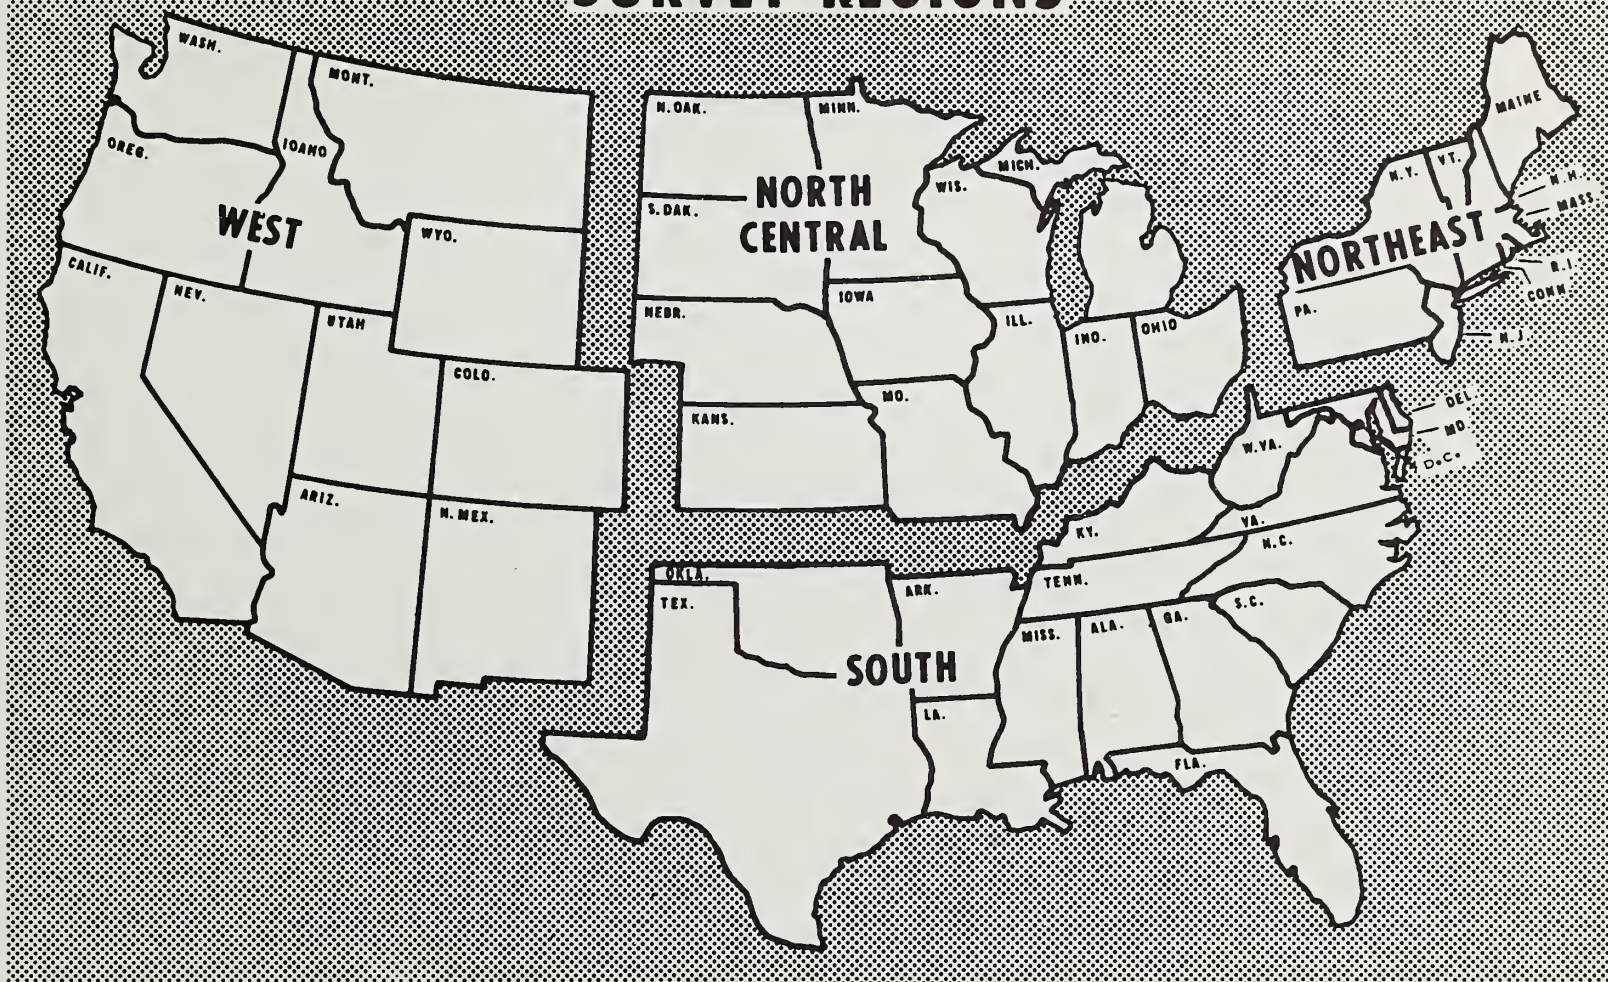

Arizona
California
Colorado
Idaho

Montana
Nevada
New Mexico
Oregon

Utah
Washington
Wyoming

Alaska and Hawaii are not included in this study.
